We highly recommend Teets Construction for any and all household remodeling. They were referred to us by the builder of our home which was 15 years old at the time of purchase in 2002 and, at that time, the house desperately needed updating. Our story began here. That summer Don and his crew totally redesigned and remodeled our guest bath including moving a wall. The project was completed before we returned to Punta Gorda in the fall of that year and everything was to our satisfaction with little effort on our part. The following summer we contracted Don and Mary to totally redesign our kitchen area. Walls were moved which provided an open area for the planned remodeling. Don's design and finished product is really spectacular. This was completed in the fall of 2003 with an abundance of input from us via phone but no real work on our part. The following summer we decided to enlarge the master bath. Actually this involved design and construction of an addition to the house which resulted in more than tripling the master bath area. Hurricane Charlie interrupted the work but by February 2005 the bath was completed to our satisfaction.

Don and Mary have become more than our contractors. They are wonderful, honest and hard working people and we consider them our friends today. We truly enjoyed the experience of working with Don and Mary and are pleased and proud of their work in our "new" home. We highly recommend Don Teets Construction for any of your building needs.
